

Cover Letter – Pearson AgentOps Engineering Apprentice

Hiring Team
Pearson India

Dear Hiring Team,

I am excited to apply for the Apprentice – AgentOps Engineering role at Pearson. As a recent Computer Science Engineering graduate specializing in AI & Machine Learning from Don Bosco Institute of Technology, Bengaluru, I am highly motivated to contribute to Pearson's vision of building enterprise-grade AI agents and intelligent automation systems.

My academic background and internship experience have provided me with strong foundations in Python programming, REST API development, machine learning, and full-stack engineering. I have built scalable applications using Django, FastAPI, React.js, Node.js, and MongoDB, while also working on machine learning projects involving predictive analytics, anomaly detection, and intelligent data processing.

What excites me most about this opportunity is Pearson's AgentOps initiative focused on production-grade AI agents, governance, observability, and responsible AI systems. I am particularly interested in AI automation, agentic workflows, and cloud-based intelligent systems, and I am eager to learn from experienced engineers while contributing to real-world AI applications.

Through my internships, I gained hands-on experience working in Agile/Scrum environments, developing APIs, implementing JWT authentication, and collaborating on full-stack applications. I am confident that my strong problem-solving mindset, willingness to learn, and passion for AI engineering make me a strong fit for this apprenticeship.

Thank you for your time and consideration. I look forward to the opportunity to discuss my application further.

Sincerely,
GIRISHA S R
