Hiring Team

NTT DATA

Bengaluru, Karnataka, India

Subject: Application for Full Stack Developer (Req ID: 357133)

Dear Hiring Team,

I am writing to express my strong interest in the Full Stack Developer position at NTT DATA in Bengaluru. As a Computer Science & Engineering graduate specializing in AI and Machine Learning from Don Bosco Institute of Technology, combined with hands-on full-stack internship experience, I am eager to contribute to NTT DATA's mission of driving responsible, enterprise-scale digital innovation.

The job description emphasizes building high-performance UIs with React.js, designing robust database relationships, and collaborating in agile environments. My background directly aligns with these core responsibilities:

- **Frontend Development:** During my internship at Okulr Techminds, I developed interactive React.js frontend components and integrated secure JWT authentication flows, which ultimately reduced integration bugs by 30%. I possess a strong proficiency in React.js, JavaScript, HTML5, and CSS3.
- **Backend & API Engineering:** I have extensive experience building scalable backend architectures and RESTful APIs using Python frameworks (Django, FastAPI) and Node.js/Express.js. Furthermore, I am highly comfortable with relational database design and query optimization using MySQL. While my primary database experience includes MySQL, PostgreSQL, and MongoDB, I am highly adaptable and excited to utilize modern backend tools like GraphQL and the Entgo ORM to model complex data relationships.
- **Problem-Solving & Collaboration:** I thrive in Agile/Scrum team environments, contributing actively to sprint planning and cross-functional deliverables. My background in data structures, algorithms, and complex data pipeline engineering—such as building an anti-money laundering detection system handling 6.3M+ financial transactions—has sharpened my analytical and troubleshooting abilities across end-to-end applications.

NTT DATA's reputation as a global technology leader that fosters an inclusive, forward-thinking environment deeply resonates with me. Based locally in Bengaluru, I am fully available for in-office collaboration and eager to take proactive ownership of deliverables to ensure team success.

Thank you for your time and consideration. I have attached my resume for your review and look forward to the possibility of discussing how my technical skills and proactive mindset can add value to your engineering team.

Warm regards,

Girisha SR
